**IMPORTANT**

Before you begin to assemble your model kit, study the instructions carefully. This will help you to familiarize yourself with the part locations as you proceed. Prior to cementing parts together, be sure to "TEST FIT" them in order to assure proper alignment and also to check for excess "FLASH" that may occur along parting lines. Use a sharp hobby knife or file to remove flash if necessary.

If you wish to paint your model, various sub-assemblies and components should be painted before any parts are attached. Paint to match the box photo. This model kit is molded from the finest high-impact styrene plastic. Use only paints and cements which are specifically formulated for styrene. Read all labels and warnings carefully.

Because the cement will only adhere to bare plastic, it is necessary to remove any paint or "plating" from the area to which the cement is to be applied.

Use a sharp hobby knife to remove parts from the

We take great pride in providing the finest model kits available, giving strong attention to detail and craftsmanship. Should you have any difficulty with the use of liquid polystyrene cement, apply with a fine brush or toothpick. Use cement sparingly or a sleepy job will result. Tweezers are handy for holding very small parts during assembly or painting.
